

(ix) **Disaster Management and Risk Assessment:**

High risk factors such as landslide, subsidence flood, fire, tailing dam failure etc are neither encountered nor anticipated. As such, emergency plan for quick evacuation measures are not proposed. Also no local habitant exists in the area.

(x) **Care and maintenance during temporary discontinuance**

A caretaker skeleton staff, mostly guard to take care of the lease area and mine machinery shall be kept under the roll of the management in case of any temporary discontinuation.

(xi) **Power Requirement & Supply / source.**

Fuel (Diesel) would be used for operating equipment like dumper etc.
